Summary

I am an aspiring Computer Science student and dedicated game developer specializing in Unity and Unreal Engine. I am passionate about creating immersive Virtual Reality (VR) environments. Leveraging my strong foundation in C++ and C#, I architect game systems, manage asset synchronization, and deliver complex VR training simulations and create engaging games. I am eager to contribute my technical skills to dynamic game development projects.

Education

BS Computer Science

Dawood University of Engineering and Technology — 2023 - 2027 (Expected)

Intermediate

National College Karachi — 2022-2023

Matriculation

Sir Syed Children's Academy — 2020-2022

Skills

Programming Languages: C++, C#

Game Engines: Unity, Unreal Engine

Version Control: Unity Version Control, Git, GitHub

Projects

Safety Hazards Training Simulator for University (Meta Quest VR)

Freelance Project

Technologies: Unity XR Toolkit for VR

- Architected and developed a VR-based training simulator, executing a comprehensive 9-week development roadmap.

- Engineered connectivity for a Content Management Interface (CMI) and successfully managed dynamic environment scaling within the simulation.
- Implemented Unity Version Control to ensure seamless project asset synchronization and safeguard development milestones.

Traffic Racer 2.0 (PC)

Personal Project

Technologies: Unity 3D

- Developed a Windows-based racing game focused on custom vehicle handling and drift mechanics.
- Engineered rear-wheel-drive car physics to create a dynamic and responsive driving experience.

PhysioLink – Immersive VR Environments for Physiotherapy (Meta Quest VR)

University Final Year Project (In Progress)

Technologies: Unity XR Toolkit for VR

- Developing a specialized, gamified VR environment integrated with medical telemetry for a final year project.
- Designing the technical scope, logic, and interactive mechanics to create an engaging, feedback-driven virtual experience.

Achievements

- 1st Place Logic Lab Hackathon 2.0 at Dawood University.
- Finalist in Procom'25 Competitive Programming event.
- Secured multiple top 4 placements in Tekken 8 tournaments, demonstrating a deep understanding of core game mechanics, balance, and interactive design from both a user and developer's perspective.
